

# Symantec Enterprise Vault 8.x for Domino: Install, Configure, & Deploy

## COURSE DESCRIPTION

The *Symantec Enterprise Vault 8.x for Domino: Install, Configure, & Deploy* course is designed for experienced Domino system administrators tasked with installing, operating, and integrating Enterprise Vault within their environments. This three-day, instructor-led, hands-on class covers how to install, configure, and use Enterprise Vault. Students will learn about the product's functionality and Enterprise Vault's features and operations.

**Note:** This course does *not* cover the NetBackup Vault option to automate tape rotation.

### Delivery Method

Instructor-led

### Duration

Three days

### Course Objectives

By the end of this course, you will be able to:

- Describe the purpose and benefits of Enterprise Vault.
- Describe the components of Enterprise Vault.
- Install and configure Enterprise Vault.
- Set up the vault site.
- Archive user mail files.

### Who Should Attend

This course is for system administrators, system engineers, technical support personnel, and system integration/development staff who are responsible for installing, operating, or integrating Enterprise Vault within their environment.

### Prerequisites

You must have a working knowledge of Windows and Domino and some system administration experience. Familiarity with Lotus Domino administration is required. An understanding of SQL Server and networking as a power user or administrator is useful.

### Hands-On

This course includes practical hands-on exercises that enable you to test your new skills and begin to transfer them into your working environment.

## COURSE OUTLINE:

### Introduction to Enterprise Vault

- Enterprise Vault overview
- Enterprise Vault functions
- Enterprise Vault architecture

### Preparing for Domino Archiving

- Domino Mail Archiving overview
- Basic design and implementation
- Installation prerequisites
- Preparing the environment

### Installing and Configuring Enterprise Vault

- Installing Enterprise Vault
- Running the Configuration Wizard
- Configuring administration access

### Configuring Vault Storage

- Archive storage overview
- Creating a Vault Store Group
- Configuring Vault Store Partitions
- Setting up Enterprise Vault site properties

### Configuring Mail Archiving: Policies and Retention

- Mail archiving overview
- Configuring mailbox policies
- Configuring desktop policies
- Defining retention and deletion

### Configuring Mail Archiving: Provisioning and Processing

- Granular provisioning for Domino Mailbox Archiving
- Enabling mailboxes for archiving

### Client Extensions

- Client access overview
- Installing and configuring client extensions
- Accessing archived mail
- Searching archived mail

### Implementing Vault Cache

- Vault Cache overview
- Configuring Vault Cache

### Configuring Journal Archiving

- Journal Archive overview
- Domino Journal Archive prerequisites
- Configuring Domino Journal Archiving

### NSF Mail File Migration

- NSF Mail File Migrator overview

- Planning NSF File Migrator
- Running NSF File Migrator
