

Symantec AntiVirus™ Corporate Edition

Automated defense and response against the latest viruses and spyware throughout the enterprise

Overview

Symantec AntiVirus™ Corporate Edition provides industry-leading, real-time virus and spyware protection and automatic removal for enterprise workstations and network servers. Side-effect repair keeps systems operational during security disruptions. Centralized configuration and deployment eases administrative burden and overhead. Integrated response content from the leader in information security helps maximize system uptime.

Key Benefits

- Advanced, enterprise-wide virus protection and monitoring from a single management console
- **NEW!** Enhanced protection from spyware and adware, including:
 - Real-time protection to reduce the risk of spyware reaching the system
 - Automatic removal for easy disposal of security risks
 - Side-effect repair to clean up registry entries, files, and browser settings after hard-to-find spyware infection
 - Control over spyware settings via existing Symantec AntiVirus™ Corporate Edition management interface
- **NEW!** Enhanced tamper protection guards against unauthorized access and attacks, protecting users from viruses that attempt to disable security measures

- Backed by Symantec™ Security Response, the world's leading Internet security research and support organization
-

Additional Features

- Centralized configuration and deployment eases administrative burden and overhead
- System Administrators can set security spyware and adware policies on an application-by-application basis
- Network audit feature enables administrators to identify which nodes are unprotected and vulnerable to attack
- Integrated response content from the leader in information security helps maximize system uptime, reduce cost of ownership, and ensure data integrity
- LiveUpdate™ technology provides a single update to protect the enterprise from viruses, malware, and spyware
- Installation tools ease migration by removing the previous technology and installing the new solution while retaining user setting
- Remote user protection and management ensures systems are in compliance with security policies prior to accessing the corporate network
