

Symantec™ Mail Security 8200 Series

Email security appliance with integrated, industry-leading antispam and antivirus technologies

Overview

Symantec™ Mail Security 8200 Series appliances are powered by industry-leading Brightmail AntiSpam technology, which offers the most accurate email security. Innovative email firewall technologies reduce email infrastructure costs by restricting unwanted connections, while the appliance form factor and automatic spam filter and virus definition updates enable easy, low-cost deployment and management. With global management, administrators can easily configure, monitor, and report on all email security appliances from a single Web-based console. Content compliance features allow administrators to gain control over inbound and outbound email content so they can enforce internal or regulatory email content policies.

Benefits

- Reduce spam and mitigate downtime with industry-leading Brightmail AntiSpam and Symantec AntiVirus™ technologies
- Simplify deployment and management with secure appliance form factor and automatic updates

- Cut infrastructure costs by restricting connections from spam-sending servers with connection management technologies
- Control inbound and outbound email content with content compliance features
- Gain insight into trends and attack statistics with predefined reports

Key Features

Industry-leading Symantec Brightmail AntiSpam

- Over 20 antispam technologies
- Worldwide Brightmail Logistics Operations Center (BLOC) coverage
- Catches spam with a 95% effectiveness rate¹
- Prevents false positives with a 99.9999% accuracy rate² (less than 1 false positive in every million messages)
- Filters 15% of worldwide email, filters 100 billion emails/month³, protects 9 of the 12 US ISPs⁴

¹ eWeek, September 2003

² "E-Mail Security Solutions Providers Seek to Stop Spam and Viruses at the Perimeter" Yankee Group Report, February 2004

³ Brightmail BLOC/Business Intelligence (June 2004 data)

⁴ "Top 22 U.S. ISP by Subscribers," Q1 2004

Award-winning Symantec AntiVirus

- Minimize network disruptions caused from virus outbreaks
- Real-time antivirus content from Symantec Security Response
- Most consistently certified virus protection in the industry

Connection Management

- Reduce email infrastructure costs by restricting spam connections
- Includes sender reputation filters, TCP traffic shaping, automated defenses, directory harvest protection, connection rejection, and administrator block/allow list

Administration

- Low administration, easy-to-deploy appliance solution
- Automatic antispam and antivirus updates delivered every 10 minutes
- Global Web-based management
- End user tools, including self-service quarantine, quarantine notifications, personal block/allow list, and personal block/allow languages
- Two models meet the needs of medium and large size organizations

Content Compliance

- Inbound and outbound email content filtering
- Enforces email content policies based on keyword dictionaries, attachment types, and custom filters

Best-in-Class Vendor

- #1 in information security
- Expertise in a range of threats, including Symantec Security Response for antivirus, Symantec DeepSight™ for global threat intelligence, and the BLOC for spam
- Capable of delivering reliable, long-term results
- Single-vendor solution; owns all key technologies
