

Symantec™ Mail Security Enterprise Edition

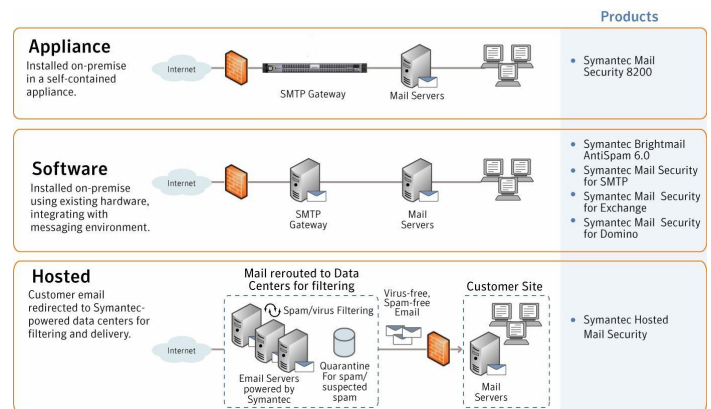

Best-of-breed multi-tiered email security for the SMTP gateway and Microsoft® Exchange or Lotus Domino® servers in a single bundled offering featuring flexible deployment options

Overview

Symantec Mail Security Enterprise Edition delivers best-of-breed antispam, antivirus, and content filtering protection for the SMTP gateway and internal messaging tiers in a single bundled offering that features flexible deployment options.

Key benefits

- Provides industry-leading email security for the SMTP gateway, Microsoft® Exchange and Lotus Domino® servers in a single bundled offering featuring flexible deployment options
- Integrates best-of-breed antispam, antivirus, and content filtering technologies to help organizations reduce spam volume and eliminate threats
- Features Symantec Brightmail AntiSpam™ technology which stops more than 97% of spam[1], with a 99.9999% accuracy rate against false positives[2]
- Delivers automatic rules updates every 10 minutes to ensure that customers have the most effective, real-time protection from new spamming techniques and traffic patterns
- Offers SMTP gateway protection in an array of flexible deployment options – software, appliance, and hosted service
- Streamlines email infrastructure management by providing all the key email security technologies from a single vendor

Deployment options for Symantec Mail Security Enterprise Edition

- Backed by Symantec™ Security Response, the world's leading antivirus, antispam, and Internet security research and support organization
- Bundle option allows customers to simplify their purchase, licensing, installation, and maintenance experience
